OVERVIEW

ShoreTel offers a portfolio of software applications that deliver on the promise of unified communications (UC) by increasing return on investment of both the ShoreTel Connect system and a customer’s existing business applications. By tying organizational communications into core business processes, these innovative solutions help to increase employee productivity, shorten response times, encourage collaboration, and improve customer satisfaction. The result is a more efficient and profitable enterprise.

Packaged offerings include automated Call Recording, Emergency Notification, Active Directory Import, and Outbound Campaign IVR as well as add-ons for ShoreTel Workgroups and Connect Contact Center, and integrations with Salesforce, Microsoft Dynamics CRM, Desk.com, Zendesk, Sage ACT!, NetSuite CRM, Copitrak, Equitrac, and many others. Software integration boosts organizational productivity and offers organizations crucial communication and safety benefits such as internal notification when emergency calls are placed on the ShoreTel Connect system.

In addition to an expanding set of packaged solutions, ShoreTel offers custom software development services to address unique business requirements and give organizations a competitive edge. Examples of custom capabilities include the ability to embed ShoreTel call control within other applications or to automatically harvest in-depth statistics using customer information. Both packaged and custom applications are available through authorized ShoreTel resellers and distributors.

This catalog is intended for reference by ShoreTel Partners and provides an overview of currently available packaged and custom applications, highlighting benefits, target markets, and ordering information. For further information, contact the ShoreTel Advanced Applications organization via email to AdvancedApps@shoretel.com (preferred) or by phone at +1 800-425-9385 x3331.

**SHORETEL ACTIVE DIRECTORY (AD) IMPORT APPLICATION**

**Overview**
- Auto synchronizes ShoreTel System Directory with Microsoft AD information
- Supports mixed PBX environments and facilitates user migration to the ShoreTel system
- Keeps ShoreTel System Directory current with AD information
- Complete corporate directory from legacy systems available on phones and from Communicator
- Custom import & update for users in groups or batches
- Custom mapping between System Directory fields and LDAP Properties
- Test run option available
- Windows Event Log summary and Application Log of AD Imports and test runs
- Optional update of user group for ShoreTel users no longer in AD
- Optional import of non-ShoreTel users facilitates system migration scenarios
- Optional AD update with ShoreTel DIDs and extensions

**Target Customers**

All ShoreTel installed base and new customers
APPLICATIONS BY FUNCTION:

Advanced Unified Communications

CRM & Business Process Integration

Contact Center

Enhanced Reporting

SHORETEL APPLICATION DIALER ("APPDIALER")

Overview

- Supports easy dialing from any Microsoft Windows application that supports "<ctrl> + C" copying of selected text
- Simply select phone number text, then press a hot key or click the AppDialer icon
- Compatible with Microsoft Office Applications such as Word, Outlook, Excel, and PowerPoint
- Allows individual users to optionally override Caller ID for their outgoing calls
- Client software loaded on user desktop machines

Benefits

- Lightweight, automatic, and generic "works everywhere" solution
- Extends ShoreTel's reach to the desktop
- User friendly – Keyboard centric users can define their own hot keys

Target Customers

Any customer whose users want to click to call from their Windows desktops
SHORETEL BCA (BRIDGED CALL APPEARANCE) CALL HOLD MONITOR

Overview
- Monitors BCA calls which have been on hold for more than a configured time
- Calls are transferred to a configurable destination when call hold time is exceeded
- Software only Application loaded onto ShoreTel Director or DVS server

Target Customers
- Retail environments where personnel serve both live customers and phone requests
  - Auto Parts, Appliance centers
  - Grocery Stores
  - Department Stores
- Any customer who uses the Bridged Call Appearance feature

Benefits
- Ensures customer satisfaction by guaranteeing that phone requests are handled promptly
- Ensures that no end customer is left on hold for an unreasonable length of time
- Simple configuration
- Support for multiple BCAs within a system
SHORETEL CALL RECORDER

Overview

- Automatic recording of external calls continuing through call transfers and redirections
- Persistent call recording captures ‘cradle to grave’ caller interactions including those with IVRs, VoiceMail, Hunt Groups, Workgroups, and other extension types
- Flexible Call Record Profiles to effectively record what needs to be recorded
- User control of Save/No Save and Pause/Resume of call recording
- Pause/Resume support allows agent to not record sensitive information (e.g. customer credit card number,) thereby facilitating PCI compliance
- Configurable Customer Stop Recording key
- Automatic storage in multiple file systems and/or multiple ShoreTel VoiceMail boxes
- Custom folder & file names in call recording archives
- Custom Subject: and From: fields in ShoreTel Voicemail box
- Web-based Recorder Player
  - Convenient searching, downloading, and management of recordings
  - Playback via phone or computer
  - Player URL access allows recording links to be embedded within web based applications including Salesforce and Contact Center Interaction Viewer among others

Target Customers

Any customer for whom audio call recording, storage, and management is critical

Benefits

- Cost-effective native ShoreTel pure-IP application
- Facilitates organizational training and operational reviews for improved customer service and fraud prevention
- Quick & easy call recording retrieval
- Configurations to help comply with national and local laws such as PCI DSS standard
- Easy scaling and strategic deployment to optimize use of ShoreTel system resources
- Single click Recording playback in context with other business data from within Salesforce and other applications

INDUSTRY VERTICAL: Healthcare
SHORETEL CALL ROUTER

Overview

• System-wide application that distributes incoming calls to configured destinations based on ANI (Caller ID) or DNIS (Called Number)
• Supports routing based on domestic & international, fully flexible number formats
• Includes a ShoreTel Director-embedded*, password authenticated administrative interface for creating routing rules
• Supports multiple route points hosting associated rule sets
• Calls with no caller ID, DNIS, or for which no match is found will be routed to a configured default destination
• Note: This capability is distinct from Personal Call Handling controls allowing user control via Professional Call Manager

* Director integration available with ShoreTel V9.2 and above; standalone web administration provided for earlier releases.

Target Customers

Wide variety of businesses who want to automatically and efficiently direct incoming calls on a system-wide basis

Benefits

• Lightweight software application installed on ShoreTel Director or any Distributed (DVS) server
• Convenient ShoreTel Director-integrated, web-based administration
• Flexible rules configuration

INDUSTRY VERTICAL:

Healthcare
SHORETEL CALLER DIRECTED ROUTER

Overview

- Server application that distributes incoming calls based on caller input (e.g. account code, zip code and others)
- Input code can be of fixed or variable length
- Includes a web based, password authenticated administrative interface for creating rules table and configuring code gathering IVR behavior
- Calls with no matching input code will be routed to a configured default destination

Target Customers

Wide variety of businesses who want to automatically and efficiently direct incoming calls based on caller input

Benefits

- Lightweight software application installed on ShoreTel HQ or any DVS server
- Convenient web-based administration embedded within ShoreTel Director-Application (ST9.2 & above)
- Flexible rules and IVR configuration and built-in rules test mode
- Application is associated with a Route Point extension; calls are routed to this extension using standard system facilities
- Codes passed as call properties to support desktop integration
- Implements multiple speed dial lists for internal users
- Multi-lingual Support
SHORETEL CONNECT FAX

Overview
Users can send and receive faxes from their desktop or mobile devices, streamlining the process and removing the dependence on standalone fax machines.

- Eliminate paper and send/receives faxes anywhere e-mail can be accessed.
- Incoming faxes are received in the email inbox. Outbound faxes are sent as email attachments.
- Faxes can be saved and searched like emails.
- Delivery confirmation sent via email.
- To fax paper documents, a scanner is used to create files for faxing.

Target Customers
- ShoreTel customers who send and receive faxes
SHORETEL COST RECOVERY INTEGRATION APPLICATION

Overview

• Alternative to built-in Account Code feature
• Provides automatic import of codes from external system
• Open design allows for easy integration with systems such as Copitrak & Equitrac, the leading legal and professional services cost recovery systems
• Automatically matches inbound & outbound phone numbers to tracking codes
• Supports both client/matter and single account code structures
• Allows code assignment during or after calls
• Summary and detailed reports included for standalone operation

Target Customers

• Any law, professional services, or consulting firm
• Any company interested in classifying phone calls

Benefits

• A specialized offering for businesses that bill their customers by the hour
• Connects a company’s UC and accounting systems for
  – More comprehensive time capture
  – Faster code matching
  – Greater accuracy
  – Easier administration
  – Increased revenue

INDUSTRY VERTICAL: Law Firms
SHORETEL “DO NOT CALL” INTEGRATION APPLICATION (PART OF THE COST RECOVERY INTEGRATION APPLICATION)

Overview
• Automatic, reliable blocking of outbound calls to designated phone numbers
• Real-time Connection to customer provided Do Not Call (DNC) data
• DNC enforcement is combined with call coding capabilities of ShoreTel Cost Recovery Integration
• Integration with customer maintained database
• Solution replaces built-in ShoreTel Account Code Feature
• Software only Application loaded onto ShoreTel Director server

Target Customers
• Any company involved with outbound calling campaigns
• Businesses dependent upon cost-effective outbound marketing
  – CC fines retroactive and prohibitively steep
  – Fee avoidance ROI easily demonstrable

Benefits
• Automatic screening and blocking of calls in real-time
• Customer directly controls DNC database
• Subscribers individually configured for one or both of Call Blocking and Call Coding
• Maintains detailed log of DNC blocking events for later review & analysis
SHORETEL DO NOT DISTURB (DND) OVERRIDE APPLICATION

Overview
- Allows phones in DND or forwarded modes (e.g. “In a Meeting”) to be called
- Caller must use special dialing technique to activate
- Software only Application loaded onto ShoreTel Director or DVS server

Target Customers
- Natural fit for customers (e.g. K-12 schools) who purchase CHM Schedule Application
- Any customer who desires the ability to communicate instantly and privately (i.e. not via intercom) with employees regardless of phone mode

Benefits
- Natural pair for ShoreTel CHM Schedule Application
- Fully automatic – Once installed, application runs continuously in background
- Special dialing technique can be shared with limited group of company personnel
- Dialing technique simple and configurable
- Configurable no answer timeout before caller will be transferred to called party’s voicemail box
- Calls must be made from a ShoreTel IP phone
**SHORETEL EMERGENCY NOTIFICATION APPLICATION**

**Overview**
- Generates audible desktop alerts & phone calls when an emergency or less urgent “code blue” call is detected
- Supports site-specific alerting for geographically dispersed businesses
- Supports country-specific and multiple external emergency numbers
- Alerts include name and extension as well as site and physical location
- Allows key company personnel to communicate in real-time
- Creates an integrated call log of code blue and emergency related activities

**Target Customers**
Businesses and organizations who want to coordinate in-house response during critical and emergency situations
- Campus Settings – Schools, corporate campuses, manufacturing plants, military bases, motels
- Widely distributed environments – Airports, amusement parks, convention centers, high-rise apartments or hotels
- Healthcare – Nursing homes, retirement facilities, clinics

**Benefits**
- Increase oversight and communication
  - Communicate in real-time using built-in client messaging
  - Alert Screens prompt for acknowledgement
- Obtain a comprehensive activity log
  - All activity is integrated into a single event log
  - Use the log for legal reference, public relations activities, safety training, and policy management
SHORETEL ENHANCED PAGING APPLICATION

Overview

• Paging solution that offers alternative to built-in ShoreTel paging
• Distributed solution, allows for intra-site paging to reduce WAN traffic
• Supports “Forced” & “Optional” modes for emergency vs. informational purposes
• Includes Text Paging to user telephone displays

Benefits

• Convenient web-based administration for setting up paging groups
• Support for “super groups” containing multiple individual groups
• Automatic call throttling
• Paging calls sent out in batches to groups with more than 100 members
• Forced mode puts any existing call on hold and connects to user to play page
• Text pages of up to 4000 characters entered via web & sent to selected groups
• Textual page causes audio ‘beep’ and lit display on user’s ShoreTel phone

Target Customers

• Large multi-site companies for whom paging in critical situations is important
• Customers concerned about WAN usage
### SHORETEL HOSPITALITY CONNECTOR

**Overview**

- Allows an external system to initiate user name, user group, and Call Handling Mode changes to ShoreTel phones
- Enables complete ShoreTel integration with Property Management Systems via applications such as DuVoice
- Enables automation and unified administration for guest check in and check out
- Software only Application loaded onto ShoreTel Director server
- This service is an enabler only that requires a compatible system (such as DuVoice) to initiate any changes.

**Target Customers**

Hotel/motel customers using a validated Application Server (such as DuVoice) for Property Management System Integration

**Benefits**

- Enables Property Management System integration to ShoreTel that reduces manual work
- Name change ensures that hotel staff phones properly display guest names
- User Group change enables control of calling permissions for each room (reducing call permissions for unoccupied rooms and increasing them at guest check in.)

---

Related Applications:

- Advanced Unified Communications
- CRM & Business Process Integration
- Contact Center
- Enhanced Reporting
SHORETEL MULTI-SUPER GROUP APPLICATION

Overview
- Allows more than 16 phones (up to 100) to simultaneously ring in response to an inbound call
- Phones will ring until configurable timeout period expires then transfer caller to VoiceMail
- Software only Application loaded onto ShoreTel Director or DVS server

Benefits
- Fills competitive gap with a common legacy feature
- Phone displays present Route Point name and calling party number
- Phone display example: “House Phone – (401) 333-8888”
- Simple configuration

Target Customers
Any environment in which traditional multi-phone ringing behavior is desirable
**SHORETEL NUISANCE CALL HANDLER**

**APPLICATION**

**Overview**

- Call monitoring application that blocks incoming calls to specified extensions and work/hunt groups from designated phone numbers
- Calls from blocked numbers are automatically disconnected or transferred to specified destinations
- Calls with no caller ID are redirected to a voicemail box with recorded message
- Application is loaded onto ShoreTel Director or DVS server and continuously monitors all extensions

**Target Customers**

Wide variety of businesses whose employees are interrupted by nuisance calls

**Benefits**

- Lightweight software application installed on ShoreTel Director or any DVS server
- Convenient web-based administration
APPLICATIONS BY FUNCTION:

- Advanced Unified Communications
- CRM & Business Process Integration
- Contact Center
- Enhanced Reporting

SHORETEL OUTBOUND CAMPAIGN IVR APPLICATION

Overview

- Allows creation of automated calling campaigns for variety of purposes
  - Simple Announcements with static, pre-scripted messages
  - Scripted Announcements with dynamic flows and contents pre-programmed for customer interactions
- Introduction and transfer to queue with associated desktop integration
- Graphical UI & Powerful Scripting to create campaigns with pre-recorded voice prompts and/or text-to-speech prompts
- Launches campaigns manually, or automatically as pre-scheduled
- Distributed architecture for easy scaling and strategic deployment across the ShoreTel system

Examples

- Appointment reminders “You have an appointment on May 12th with Dr. Kelly. Press 1 to confirm or press 2 to be connected to our office to re-schedule.”
- Financial Transactions: “Your electric bill is 3 days overdue. Your last payment was made on December 16th in the amount of $176.48. Press 1 to make a payment using our automated system or press 2 to speak to an agent.”
- Community Reminders, School Snow Days

Benefits

- Efficient and accurate customer care with minimal resources
- Flexible Interactive Notification offering
- Wide Variety of audiences: Medical Offices, Utilities, Schools, Government
- Software only – Leverages existing ShoreTel system resources
- Works equally well with ShoreTel Workgroup and Contact Center deployments
- Customers easily create Sophisticated Interactive Call Flows
SHORETEL PHONE USE SCHEDULER
APPLICATION

Overview
- Automatically sets a group of phones into the configurable “busy” or “available” state based on a pre-set schedule
- Phone states are set based on hour of the day for each day in the week
- Used to prevent inbound calls at certain times of day
- Software only Application loaded onto ShoreTel Director or DVS server
- Allows you to change the Call Handling Mode, the User Group or to send the extension back to the primary extension assignment either on command or on a schedule

Target Customers
- K-12 schools for blocking calls into classrooms during teaching hours
- Medical facilities with shared use rooms

Benefits
- Extends ShoreTel ease-of-use
- Centralized management for consistent system behavior and less work for users
- Intuitive color coded administrative interface
- Pairs perfectly with ShoreTel DND Override Application for full flexibility

INDUSTRY VERTICAL: Education
SHORETEL SCHEDULE BASED ROUTING ("ON CALL ROUTER") APPLICATION

Overview

- Automatically routes inbound calls based on customer-defined schedules
- Administrative interface for editing schedules and routing destinations
- Automates contact of professionals according to on call schedules
- Software Application loaded onto ShoreTel Director or DVS server

Benefits

- Eliminates overhead by automating communications
- Intuitive color coded administrative interface
- Day, Week, Month, and Year schedule views
- Lightweight server application associated with ShoreTel Route Point

Target Customers

- Medical environments with on call doctors
- Helpdesks where on call support individuals vary based on a schedule
SHORETEL SITE ROUTER APPLICATION

Overview

- Routes calls based on the ShoreTel Site of the caller
- Flexible configuration to define multiple Route Points and destination numbers for sites

Benefits

- Publish system wide numbers which route calls to site specific numbers
- Useful for defining a single number for company departments (e.g., HR, Emergency) which forwards calls to a site specific department

Target Customers

Customers with multiple ShoreTel sites
SHORETEL SYSTEM DIRECTORY SYNCHRONIZATION APPLICATION

**Benefits**
- Provides a global Dial-By-Name directory for placing calls from ShoreTel IP phones and from ShoreTel Communicator

**Overview**
- Synchronizes System Directory information between/among separate ShoreTel systems
- Any number of ShoreTel systems may be synchronized with each other
- Imports first name, last name, and extension number into the System Directory
- Runs daily during off-hours periods

**Target Customers**
Customers running multiple ShoreTel systems who want to facilitate employee communications
SHORETEL TRANSFER TO PROMPT APPLICATION

Overview

- Allows an agent to transfer the current call in order to play a pre-recorded message to the connected party
- Speeds up handling of calls best served with pre-recorded audio
- Frees call center agents to answer new calls and novel questions
- Supports silence detection so that calls can be immediately transferred into voicemail systems, freeing agent for the next call. Application will, with no user involvement, await greeting completion before playing message.
- Desktop software allows individual users to easily record and name new message files for subsequent selection
- Software only application
  - Server component runs on ShoreTel Director and/or DVS servers
  - Client component runs on users’ Windows desktop machines

Target Customers

- Organizations required to repetitively communicate legal, disclaimer, or other information to their customers
- Organizations desirous of incorporating marketing or informational communications into all of their client interactions
- Call Center environments where customer satisfaction and employee productivity are paramount

Benefits

- Increases call center efficiency
- Reduced wait times for live assistance and optimal use of human capital
- Pre-recorded messages can be shared across agents to ensure completeness and consistency of communications
- Easy to use desktop software allows users to create new messages to facilitate their work in an ad hoc way
SHORETEL VOICE FORMS IVR APPLICATION

Overview

- Configurable IVR Application that allows callers to fill out “forms” over the phone
- Application prompts caller with questions and awaits response before proceeding
- All verbal responses are consolidated into a single voice file which is stored in a designated ShoreTel VoiceMail box
- Software only Application loaded onto ShoreTel Director or DVS servers

Examples

- Subscription Refill Application
  - Callers respond one by one to questions when prompted
  - All answers are consolidated into a single voice file which is stored in a ShoreTel Voicemail box
  - Administrators later retrieve and fulfill medicine refill requests
- Product Ordering Application
  - Callers specify product model, billing, and other information
  - Order Administrators later retrieve orders to fulfill

Benefits

- Cost effective solution that leverages in place ShoreTel resources
- Easily modified and deployed for a variety of purposes
- Flexible, configurable via XML script files
- Callers can be presented with a menu of options once the form is complete
- Options might include starting another form or transferring caller to an operator
SHORETEL WEB DIALER

Overview

- Two Web Dialer variants to cover all major browsers on all major platforms
- Highlights (in ShoreTel orange) & creates clickable links to phone numbers
- Clicking on a highlighted phone number connects ShoreTel phone to that number
- Connects the ShoreTel system to any web-based application or phone directory
- Adds a “ShoreTel Web Dialer” item to the browser context menu for “short” digit sequences such as internal extensions or numbers in text/input boxes
- Rescan button to recalculate links for pages with dynamic content
- Provides dialing options for ambiguous strings of digits

Benefits

- Enhances user productivity by making communicating easier
- Generation of dial-able links can be enabled & disabled using the toolbar control
- Ability for web page designers to create links for any number that can be created on a web page

Target Customers

Any company whose employees leverage web browsers for their work
SHORETEL ACT! INTEGRATION APPLICATION

Overview

- Screen Pop Integration to Sage ACT!
- Sage ACT! is a customer/contact management system
- ShoreTel provides a fully configurable Caller ID based display of key customer information
- ShoreTel Contact Popup displays information elements as hyperlinked functions
  - Contact, Company, Website
  - Current Opportunities & Activities, Recent History and Notes
  - Address: Triggers browser window to display map of mailing address
- User configurable options for customizing contents of ShoreTel Popup
- Color coding of text and background indicates contact type (Prospect, Customer, Employee, Family, Friend)
- Pop-up includes embedded call control – Answer, Transfer with real-time note, Disconnect
- Custom ShoreTel dial control button embedded within ACT!
- Client software loaded on user desktop machines
- Compatible with ACT! thick client (not browser based version)

Target Customers

Any customer running Sage ACT! (desktop client version) revision 2010 or later

Benefits

- Richly featured integration for wide variety of customers
- Increases productivity & enhances customer service levels
- User friendly – Employees enjoy individual control over application behavior
SHORETEL AMS 360 INTEGRATION APPLICATION

Overview

- Screen Pop Integration to Vertafore AMS 360
- AMS 360 is an office management system for Independent Insurance Agencies
- ShoreTel provides a Caller ID based display of key customer information
- Key information elements are hyperlinked functions:
  - Account Number: Triggers AMS 360 to display customer record
  - Address: Triggers browser window to display map of mailing address
- User configurable options for showing links to Active Policies and/or Uncompleted Suspense Items
- Color coding of text and background highlights customer type
- Pop-up includes embedded call control – Answer, Transfer with real-time note, Disconnect
- Client software loaded on user desktop machines

Target Customers

All Independent Insurance Agencies (Brokers) using Vertafore AMS 360

Benefits

- Tight & richly featured integration designed expressly for Insurance Agencies
- Increases productivity & enhances customer service levels
- User friendly – Employees enjoy individual control over application behavior
SHORETEL CONNECT CLOUD INSIGHTSQUARED INTEGRATION

Overview
ShoreTel has partnered with InsightSquared, the leading provider of business intelligence software for small and medium-sized businesses.

As a result of the partnership, ShoreTel customers will be able to manage their data generated from ShoreTel Connect CLOUD alongside data from other systems, such as their CRM or applicant tracking system, in InsightSquared’s business intelligence product. This empowers decision makers to make better, data-driven decisions in order to improve efficiency and increase revenue.

Benefits
- Manage data from the business phone system and other applications, such as the CRM or applicant tracking system, in one easy to use interface
- Visualize trends in voice and data to understand the “why” of spikes and valleys in activity
- Save time, effort and money by eliminating the need to manually generate reports or hire data analysts
- Identify actions that will positively impact efficiency and revenue
SHORETEL CONNECT CLOUD JOBDIVA ATS INTEGRATION

Benefits

- **Click-to-Dial** – Start a call from within JobDiva anytime a phone number is available
- **Inbound Screen Pops** – Display lead or customer information before the call is answered
- **Automatic Note Taking** – Post a call note when you click-to-dial
- **Real Time Analytics** – Measure sales, support and operational success
- **ShoreTel Connect CLOUD for Staffing**

Overview

- As the global technology leader in today’s staffing industry JobDiva provides a complete, front-to-back-office Talent Acquisition Solution combining a powerful Applicant Tracking System (ATS), a Customer Relationship Management (CRM) application, synchronization with all major job boards and VMS providers, social media recruiting, robust financial tools, and more.
- ShoreTel Connect CLOUD for JobDiva is a service provided by ShoreTel Connect CLOUD that allows JobDiva users to interact or control a ShoreTel Connect CLOUD phone from within the Job Diva application. This integration not only makes recruiters more productive, but it also gives managers a view into recruiter performance and best practices.
SHORETEL CONNECT CLOUD JOBSCIENCE INTEGRATION

Overview

As the leader in Social Relationship Management for Recruiting, JobScience understands that social connectivity is more than a feature—it’s the future. ShoreTel Connect CLOUD for JobScience takes that connectivity one step further by integrating our telephone system with the JobScience application. The result is an easy to use, yet sophisticated solution that helps staffing firms increase productivity, achieve more placements and impact the bottom line. The smartest staffing and recruiting firms are investing in technology to have the best tools in place to make placements. They also realize success largely depends on having the right talent. In order to attract and retain top talent, firms need to offer the right technology and tools to help recruiters and sales people be successful. Our clients tell us that the combination of ShoreTel Connect CLOUD and JobScience sends the message that team success and customer service are the heart of what they do.

ShoreTel Connect CLOUD offers a great business phone system. When coupled with the power of JobScience recruiters and managers alike see the benefits.

Benefits

- Click-to-Dial – Start a call anytime a phone number is available
- Inbound Screen Pops – Display lead or customer information before the call is answered
- Automatic Note Taking – Post a call note when you click-to-dial
- Real Time Analytics – Measure sales, support and operational success
SHORETEL CONNECT CLOUD MAXHIRE ATS INTEGRATION

Overview

Users of the MaxHire Connected Front Office, get everything they need to source, screen and place candidates in one system. With ShoreTel Connect CLOUD for MaxHire, ShoreTel Connect CLOUD business phone system users can click-to-dial to start a call from within MaxHire anytime a phone number is available. Note taking is automated and real time analytics are available to help measure placement, sales and customer service success. Eliminating the gap between the recruiting system and the telephone, makes it possible to improve the system’s data and analytics, while at the same time satisfying the recruiter’s need for speed and ease of use.

If you are not yet an ShoreTel Connect CLOUD phone system customer, contact us to learn more about how this and other ShoreTel Connect CLOUD integrations can eliminate the friction between productivity and good analytics. If you are already a ShoreTel Connect CLOUD phone system user, ask your account representative for more information about ShoreTel Connect CLOUD for MaxHire.
SHORETEL CONNECT CLOUD NETSUITE INTEGRATION

Overview
NetSuite Inc. is a leading vendor of cloud computing business management software suites. Their mission is to provide web-based integrated business systems with the power of traditional applications used by the world's largest companies, but at a fraction of the cost and complexity.

ShoreTel Connect CLOUD for NetSuite completes the picture of an integrated enterprise by seamlessly joining NetSuite and the telephone for optimal information management and productivity. Integrated telephony features, once only available in the call center, are now accessible to the entire enterprise. Increase the effectiveness of your sales team.

First and foremost, we offer a great cloud phone system. To that, add sophisticated integration with NetSuite and the choice is clear.

Benefits
- **Click-to-Dial** – Start a call from within NetSuite anytime a phone number is available. Click-to-dial saves 15-30 seconds and “fat finger” mistakes are eliminated. Less time dialing and means more time focused on core functions.
- **Inbound Screen Pops** – Inbound screen pops provide instant visibility of who is calling. Relevant contact information is displayed before the call is answered.
- **Automatic Note Taking** – Post a call note when you click-to-dial.
- **Real Time Analytics** – Measure representative and campaign success. Understand call quality, not just quantity.
SHORETEL JACK HENRY SYMITAR™ SCREEN POP

Overview

- Screen pop application for popular credit union core processing system
- Jack Henry Symitar™ is a leading system provider to Credit Unions
- ShoreTel interacts with Symitar™’s Windows thick client component named “Episys”
- Lightweight desktop client software
- Must pair with ECC or a ShoreTel Caller Directed Router Application to allow caller to enter Account Number (ANI based screen pops are not supported by Symitar)

Target Customers

Credit Unions who want to increase efficiency and member service levels

Benefits

- ShoreTel differentiator in Credit Union vertical
- Leverages built-in Symitar™ telephony framework – “Telephone Call Queue”
- ShoreTel integration compatible with both ShoreTel Workgroups and Contact Center
- Credit Union member enters Account number via front end IVR
- When no match is found, an “Account lookup Window” will pop to user
- Cost effective, built from a library of building blocks
- Reliable Account number-based record matches
SHORETEL LEXISNEXIS TIME MATTERS™ INTEGRATION APPLICATION

LexisNexis Time Matters represents a practice area specialty for the ShoreTel Advanced Applications organization. We have delivered Time Matters-based integration solutions in the past and can leverage that experience to provide economical solutions going forward. New customer requests will be treated as custom projects requiring some basic discovery and a statement of work document. The goal will be to leverage existing software to the largest extent possible, thereby containing costs.

Overview

- Seamless integration of leading legal software with ShoreTel UC system
- Automated access to client records & creation of phone records based on phone number matches
- Embedded click to call support (works natively with ShoreTel TAPI)
- Users customize application behavior according to individual preferences
- Client software loaded onto users’ desktop computers

Target Customers

- Law Firms who use LexisNexis Time Matters for practice management
- Any professional services firm who uses Time Matters

Benefits

- Time Matters is a leading practice management system: www.timematters.com
- ShoreTel integration a significant competitive differentiator
- Combines voice capabilities with immediate access to customer data
- Enhances caller satisfaction and employee productivity
- Consolidates all client-related data and communications within a single repository
ShoreTel Microsof Dynamics® CRM Integration

Overview

- Seamlessly integrate Microsoft CRM customer data
- Automate records access for both inbound and outbound calls
- Preview CRM entities from automated screen pop
- View active calls and associations to CRM entities through an automated window
- Create phone call activity records automatically or manually
- Control all active calls from the desktop
- Automatically answer ringing calls while simultaneously opening an associated CRM form
- Click to call outbound numbers using the ShoreTel Web Dialer application

Benefits

- Fully leverage your most valuable information asset: Customer data
- Use the convergence of voice and data to enhance productivity, shorten response times, and increase customer loyalty
- Consolidate data for better reporting and improved decision making
- Integrate seamlessly using personalized setting options
- Realize immediate benefits from ease of installation and intuitive interface

Target Customers

Any customer running Microsoft Dynamics CRM Online and On-premises versions 4.0 and 2011.
SHORETEL NETSUITE® INTEGRATION

Overview
- Merges ShoreTel UC with NetSuite services
- Automates routine tasks and ensures accurate record keeping
- Configurable Screen pop, automatic record creation and call logging, and embedded click to call

Target Customers
Any user of NetSuite CRM

Benefits
- Seamlessly links enterprise communications with key customer data
- Enhances productivity by automatically linking calls to existing customer accounts records
- Improves handling of new accounts by providing automated customer record creation options
- Encourages collaboration among employees
- Improves customer service and satisfaction
SHORETEL RIGHTNOW™ CRM INTEGRATION

RightNow CRM represents a practice area specialty for ShoreTel Advanced Applications organization. We have delivered RightNow CRM-based integration solutions in the past and can leverage that experience to provide economical solutions going forward. New customer requests will be treated as custom projects requiring some basic discovery and a statement of work. The goal will be to leverage existing software to the largest extent possible, thereby containing costs.

Overview

• Desktop client application to automate RightNow™ CRM screen displays
• Software accepts call parameters and triggers RightNow™ CRM behavior accordingly
• Examples:
  – Trigger RightNow™ CRM incident screens based on ID entered by caller
  – Trigger contact screen display based on caller ID
  – Create a new incident based on IVR-entered parameters such as product model number
• Customizable to align with specific customer call flows and RightNow™ implementations

Benefits

• Increases agent productivity be automating routine tasks
• A natural extension for customers who have deployed RightNow™ CRM
• Flexible settings: Inbound/Outbound, Internal/External, On Answer/On Appearance
• Choice of automatic or user-initiated pop
• Can be paired with ShoreTel AppDialer to provide outbound click to dial from RightNow™ CRM

Target Customers

• Any customer running RightNow™ CRM
• May apply to Sales, Support, or Manufacturing Logistics functions
SHORETEL CONNECT FOR CHROME BROWSER

Overview

ShoreTel Connect for Chrome™ browser provides unified communication integration between ShoreTel Connect CLOUD and ONSITE, Google G Suite and Google Chrome. This product is installed by adding ShoreTel Connect for Chrome browser as an extension in the Google Chrome browser. Users can have their business G Suite account in multiple browser tabs at the same time while using the ShoreTel Connect for Chrome browser extension. When you are creating a one-time or recurring Google Calendar meeting, you can add a ShoreTel conference bridge to the meeting. Web dialer functionality is enabled by default when you install the ShoreTel Connect Chrome browser extension. When the web dialer appears as a ShoreTel swirl icon next to a phone number, click the swirl icon to place a call.

Connect for Chrome browser is free for Connect ONSITE and CLOUD users with Essentials, Standard and Advanced product or service plans. Get up and running fast by downloading the ShoreTel Connect extension from the Google Web Store.

Benefits

- Integrated call control streamlines workflows and maximizes productivity
- Combined contact list makes it easy to search for Google G Suite and Connect contacts
- Ability to join web conferences fast with a simple click
- ShoreTel bridge URL allows meeting participants to collaborate with tools such as messaging and screen sharing
SHORETEL CONNECT FOR CHROME BROWSER

Overview

ShoreTel Connect for Chrome™ browser provides unified communication integration between the ShoreTel Connect CLOUD and ONSITE platforms and Google’s G Suite apps (Gmail and Calendar). This product is installed by adding ShoreTel Connect for Chrome browser as an extension in the Google Chrome browser. Users can have their business G Suite and personal Gmail accounts open in multiple browser tabs at the same time while using the ShoreTel Connect for Chrome browser extension. If your ShoreTel Connect account provides access to ShoreTel Conferencing, when you are creating a one-time or recurring Google Calendar meeting, you can add a ShoreTel Conference Bridge to the meeting. Web Dialer Functionality is enabled by default when you install the ShoreTel Connect for Chrome browser extension. When Web Dialer appears as a ShoreTel swirl icon next to a phone number, click the swirl icon to place a call.

Connect for Chrome is free for Connect ONSITE and CLOUD users with Essentials, Standard and Advanced product or service plans. Integrated call control and presence. Get up and running fast by downloading the ShoreTel Connect extension from the Google Web Store.

Benefits

- Integrated call control streamlines workflows and maximizes productivity
- Combined contact list makes it easy to search for Google G Suite and Connect contacts
- Ability to join web conferences fast with a simple click
- ShoreTel bridge URL allows meeting participants to collaborate with tools such as messaging and screen sharing
SHORETEL FOR SALESFORCE™

Overview

- Cloud Softphone based on Salesforce OpenCTI
- Browser based, no desktop software
- Compatible with Windows, Mac, Linux
- Improve workflow by associating Salesforce records with a call, add comments to user records then transfer call or conference with another agent
- Customize Salesforce screen layout for preferences and workflow
- Enjoy call control features embedded within Salesforce application
- Monitor and adjust workgroup agent status
- Leverage rich reports that merge call activities with customer data
- Call recording controls embedded in Softphone (Pause/Resume and Save/No Save recording)
- Call recording playback with a single click at Salesforce Call Connection record

Target Customers

Any Salesforce Professional, Enterprise or Unlimited Edition customer.
SHORETEL FOR SALESFORCE™ CONNECTOR FOR CONTACT CENTER IVR

This software enables tight integration between ShoreTel Contact Center and Salesforce, enabling IVR call flows based on CRM housed business intelligence. Customer specific Contact Center scripting and Salesforce configuration are both required and are then combined with this “connector” software to produce an end to end solution. New customer requests will be treated as custom projects requiring collaboration among a Contact Center script developer, the Customer’s Salesforce administrator, and a ShoreTel Advanced Applications developer.

Overview

- Enables design of dynamic ShoreTel Contact Center IVR call flows based on Salesforce information
- Examples include routing based on client VIP flag & special prompting of unknown callers
- Automates call processing based on chosen customer, lead, or other attributes
- Tightly links dynamic customer data with call center operations
- Flexible design – End to end solutions are customized to fit customer’s Salesforce data structure and desired call flows

Target Customers

ShoreTel Contact Center customers using Salesforce
SHORETEL FOR SALESFORCE™ CALL REPORTING SERVICE

Overview

• Continuous, near real-time import of ShoreTel CDR to Salesforce
• ShoreTel Call Detail Reporting (CDR) data is automatically correlated with Salesforce entities (Accounts, Contacts, Leads & Opportunities)
• Enables integrated ShoreTel/Salesforce analytics using Salesforce Reporting capabilities
• Captures missed calls as well as calls made when users are not logged into their Salesforce Softphones
• Captures calls made via ShoreTel Mobility
• Captures calls made to ShoreTel Workgroups
• Includes six pre-built reports to track calls and call volume by user or by Account, Contact, Lead, and Opportunity
• Allows for creation of a virtually unlimited number of customized reports
• Includes ShoreTel HQ server and Salesforce AppExchange Package Software components

Target Customers

Any company using ShoreTel and Salesforce (Enterprise Edition or higher)
SHORETEL SEDC UTILITYPOWERNET CONNECTOR

Overview

- The SEDC UPN is a Utility company CRM
- Screen-pop customer record based on Caller ID (ANI), account number, member number, social security number, or collected phone number using EasyPop or Contact Center Agent Toolbar
- ShoreTel Contact Center IVR interface that provides callers the ability to:
  - Obtain account information
  - Update account information, and
  - Make credit card payments

Target Customers

Utility customers using the SEDC UtilityPOWERnet CRM

Benefits

- Rapid access to customer data upon call arrival
- Personalized call handling
- Self service portal for customers
SHORETEL UNIVERSAL CRM CONNECTOR (AKA “EASYPOP”) APPLICATION

Overview

- Generic desktop client screen pop “helper” application
- Provides ability to execute a particular user defined program, batch file, or URL when an incoming call arrives and/or an outgoing call is placed
- Any or all available ShoreTel call properties including IVR collected digits can be passed to an outside program
- Software only Application loaded on user desktop computers

Benefits

- Speeds development of proprietary applications by insulating user from ShoreTel programming details
- User concentrates on target function development and simply configures ShoreTel EasyPop settings as desired
- Choice of automatic or user-initiated trigger behavior

Target Customers

Any customer desiring economical path to powerful desktop integration
SHORETEL FOR ZENDESK

Overview

- Cloud based UC tool embedded within a Zendesk top bar application
- Browser and desktop platform agnostic (Windows, Mac, Linux)
- ShoreTel Call Control embedded within Zendesk – answer, disconnect, transfer, conference, hold
- Automatic creation and display of Zendesk tickets
- ShoreTel call information embedded in Zendesk ticket fields allowing for post processing by Zendesk reporting tools
- Click-to-play call audio recordings automatically embedded in Zendesk tickets (for customers who have deployed ShoreTel Call Recorder)
- ShoreTel Directory Integration with real-time telephony presence
- Click to dial from within Zendesk user or ticket records
- Embedded ShoreTel Call Handling Mode control
- Workgroup Agent status control

Target Customers

Any company using ShoreTel (Version 13 and higher) and Zendesk (New and not Classic Edition)

Benefits

- Improve Customer Service
- Increase agent productivity and shorten response times
- Leverage integrated analytics to refine business processes
- Rich, integrated communications from a single application
SHORETEL CALL RECORDER

Overview

- Automatic recording of external calls continuing through call transfers and redirections
- Persistent call recording captures ‘cradle to grave’ caller interactions including those with IVRs, VoiceMail, Hunt Groups, Workgroups, and other extension types
- Flexible Call Record Profiles to effectively record what needs to be recorded
- User control of Save/No Save and Pause/Resume of call recording
- Pause/Resume support allows agent to not record sensitive information (e.g. customer credit card number,) thereby facilitating PCI compliance
- Configurable Customer Stop Recording key
- Automatic storage in multiple file systems and/or multiple ShoreTel VoiceMail boxes
- Custom folder & file names in call recording archives
- Custom Subject: and From: fields in ShoreTel Voicemail box
- Web-based Recorder Player
  - Convenient searching, downloading, and management of recordings
  - Playback via phone or computer
  - Player URL access allows recording links to be embedded within web based applications including Salesforce and Contact Center Interaction Viewer among others

Target Customers

Any customer for whom audio call recording, storage, and management is critical

Benefits

- Cost-effective native ShoreTel pure-IP application
- Facilitates organizational training and operational reviews for improved customer service and fraud prevention
- Quick & easy call recording retrieval
- Configurations to help comply with national and local laws such as PCI DSS standard
- Easy scaling and strategic deployment to optimize use of ShoreTel system resources
- Single click Recording playback in context with other business data from within Salesforce and other applications

INDUSTRY VERTICAL:

Healthcare
Applications by Function:

- Advanced Unified Communications
- CRM & Business Process Integration
- Contact Center
- Enhanced Reporting

ShoreTel Contact Center Agent Dashboard

Overview

- Add-on application for ShoreTel Contact Center to display real-time customer service metrics
- Configurable Contact Center Agent Dashboard (CCAD) reports on Agent and Group Performances:
  - Group Agents Report: Agent State details
  - Group Report: Real-time metrics for both ACD voice and e-mail calls
  - Department Performance Report: Real-time, daily accumulative call-answer rate in a department
  - Daily Group Report: Real-time daily accumulative call-answer rate of the configurable group of active agents
- Conscientious designs for minimal report footprint include informative tooltips and a separate full screen mode
- Administrators to design custom CCAD webpages and users to personalize report displays
- Clear report captions and color-coded thresholds
- Compatible with ShoreTel Contact Center 6 and higher
- Supports Apple iPad platform in addition to Windows and Apple Mac
- Not replacement for the Contact Center Agent Manager or Wallboard Applications

Benefits

- User-friendly report displays and at-a-glance summaries of service status
- Communicates key metrics to agents in real time, empowering them to self-manage
- Extends real-time performance monitoring capabilities to all agents
- Easily managed single web application for designing, publishing, and viewing

ShoreTel Advanced Applications Catalog
CONTINUING CENTER EMAIL ALERT SERVICE

Overview

- Monitors Contact Center group performance and sends Email notifications when configured thresholds are reached
- Performance metrics that can be monitored include:
  - Calls in queue
  - Average wait time
  - Maximum wait time
  - Average speed of answer
  - Agents on non-ACD Calls
- Up to 100 alerts can be configured, each with a different group, threshold, and/or target Email address
- A minimum re-alert time avoids an excessive number of alerts in a short time

Target Customers

Any company that relies upon ShoreTel Contact Center to serve their clients

Benefits

- Enables call center supervisors to react quickly to trends such as increasingly long wait times or quickly multiplying calls in queue counts
- Improved customer service
SHORETEL CONTACT CENTER INSTANT OVERRIDE MESSAGE

Benefits

- Easy to use phone interface for changing an override message
- Immediately inform Customers of emergency conditions without requiring computer based access to Contact Center administration
- Retail customers may inform callers of daily specials.
- Countless other uses

Overview

- Telephone User Interface (TUI) for rapidly changing a Contact Center override announcement wave file
- PIN authentication to prevent unauthorized access
- Provides functions to play the existing override message, disable the override message, enable a pre-recorded override message, and to record and enable a custom override message.
- Microsoft Windows event log audit trail
- Application is installed on the primary and optional backup Contact Center Server

Target Customers

Contact Center customers wishing to rapidly change IVR announcements
Applications by Function:

- Advanced Unified Communications
- CRM & Business Process Integration
- Contact Center
- Enhanced Reporting

Shoretel Contact Center Interaction Viewer

Overview

- Web based Application for viewing “Cradle to Grave” information on a call by call basis
- Extensive data filtering from date/time range to advanced matching conditions
- Optional links to audio call recordings when paired with ShoreTel Call Recorder
- Tie to ShoreTel CDR - Each call is “clickable” to determine complete routing from trunk to agent
- Requires CCIR Transform Service which transforms ‘raw’ CCIR data

Target Customers

Any customer desiring easy access to detailed call by call (as opposed to statistical) information
SHORETEL FOR DESK.COM

Overview

- Cloud based UC tool embedded within Desk.com
- Browser and desktop platform agnostic (Windows, Mac, Linux)
- ShoreTel Call Control embedded within Desk – Answer, disconnect, transfer, conference, hold
- Automatic association of cases with calls and case screen pop on call transfers
- Call Recording Controls (Pause/Resume, Save/No Save) embedded within Softphone (for customers who have deployed ShoreTel Call Recorder)
- Click-to-play call recordings automatically associated with Desk cases (for customers who have deployed ShoreTel Call Recorder)
- ShoreTel Directory Integration with real-time telephony presence
- Click to Dial from within Desk user or ticket records
- ShoreTel Call Handling Mode control
- Workgroup Agent status control
- Last ‘n’ calls display for convenient reference and callback

Benefits

- Improve Customer Service
- Increase agent productivity and shorten response times
- Rich, integrated communications from a single application
- Powerful new tools to enable business process and employee performance reviews

Target Customers

Any company using ShoreTel (Version 13 and higher) and Desk.com
**SHORETEL FOR SALESFORCE™ CONNECTOR FOR CONTACT CENTER IVR**

This software enables tight integration between ShoreTel Contact Center and Salesforce, enabling IVR call flows based on CRM housed business intelligence. Customer specific Contact Center scripting and Salesforce configuration are both required and are then combined with this “connector” software to produce an end to end solution. New customer requests will be treated as custom projects requiring collaboration among a Contact Center script developer, the Customer’s Salesforce administrator, and a ShoreTel Advanced Applications developer.

**Overview**

- Enables design of dynamic ShoreTel Contact Center IVR call flows based on Salesforce information
- Examples include routing based on client VIP flag & special prompting of unknown callers
- Automates call processing based on chosen customer, lead, or other attributes
- Tightly links dynamic customer data with call center operations
- Flexible design – End to end solutions are customized to fit customer’s Salesforce data structure and desired call flows

**Benefits**

- Automated call routing and other processing based on business intelligence
- Improved Contact Center efficiency
- Enhanced customer service

**Target Customers**

ShoreTel Contact Center customers using Salesforce
SHORETEL FOR SALESFORCE™ CALL REPORTING SERVICE

Overview

- Continuous, near real-time import of ShoreTel CDR to Salesforce
- ShoreTel Call Detail Reporting (CDR) data automatically correlated with Salesforce entities (Accounts, Contacts, Leads & Opportunities)
- Enables integrated ShoreTel/Salesforce analytics using Salesforce Reporting capabilities
- Captures missed calls as well as calls made even when users are not logged into their Salesforce Softphones
- Captures calls made via ShoreTel Mobility
- Captures calls made to ShoreTel Workgroups
- Includes six pre-built reports to track calls and call volume by user or by Account, Contact, Lead, and Opportunity
- Allows for creation of a virtually unlimited number of customized reports
- Includes ShoreTel HQ server and Salesforce AppExchange Package Software components

Benefits

- Gain unprecedented insight into business operations with sophisticated analytics
- Leverage integrated ShoreTel/Salesforce analytics to refine business processes
- Boost customer service and extend your competitive advantage by unleashing the full potential of the tools your workforce uses every day

Target Customers

Any company using ShoreTel and Salesforce (Enterprise Edition or higher)
SHORETEL FOR ZENDESK

Overview
- Cloud based UC tool embedded within a Zendesk top bar application
- Browser and desktop platform agnostic (Windows, Mac, Linux)
- ShoreTel Call Control embedded within Zendesk – answer, disconnect, transfer, conference, hold
- Automatic creation and display of Zendesk tickets
- ShoreTel call information embedded in Zendesk ticket fields allowing for post processing by Zendesk reporting tools
- Click-to-play call audio recordings automatically embedded in Zendesk tickets (for customers who have deployed ShoreTel Call Recorder)
- ShoreTel Directory Integration with real-time telephony presence
- Click to dial from within Zendesk user or ticket records
- Embedded ShoreTel Call Handling Mode control
- Workgroup Agent status control

Target Customers
Any company using ShoreTel (Version 13 and higher) and Zendesk (New and not Classic Edition)

Benefits
- Improve Customer Service
- Increase agent productivity and shorten response times
- Leverage integrated analytics to refine business processes
- Rich, integrated communications from a single application
SHORETEL CONNECT CLOUD CALL RECORDING

Overview
ShoreTel Connect CLOUD Replay gives subscribers the ability to record phone calls and retrieve the recording via a Web interface. All calls can be automatically recorded, or call recording can be configured for selective use with the push of a button on the telephone.

- Record
- Playback
- Manage

Benefits
- Provides powerful and feature rich unified communications at an affordable price point
- Installs quickly and easily, and integrates system management
- Empowers employees with flexible communications tools, regardless of location, to increase productivity
- Improves business agility with a platform built for growth

Target Customers
- ShoreTel customers using Contact Center
SHORETEL CONNECT SCRIBE

The ShoreTel Connect Scribe service transcribes voice messages received by a ShoreTel phone system user and sends the text, along with a WAV file, to a specified e-mail address. ShoreTel Connect Scribe enables the ability to visually review voice mail and save the text file for archival purposes. Caller information is provided as part of the transcription process, and the audio file is attached to the email as a WAV file for playback.

Overview

• Receive and read voicemail on mobile phones, compatible portable devices and/or email.
• ShoreTel Scribe makes searching for voice messages as easy as searching for an email.
• Important numbers, names and addresses are easy to find, easy to access and easy to archive.

Benefits

• Large multi-site companies for whom paging in critical situations is important
• Customers concerned about WAN usage

Target Customers

• Any customer utilizing ShoreTel Contact Center
SHORETEL CUSTOM REPORTS

ShoreTel Advanced Applications organization offers several packaged ShoreTel CDR reports (please reference the ShoreTel Enhanced Reports entry in this catalog.) To ensure an economical solution, we generally advise that customers first review entire set of built-in and pre-built enhanced reports before engaging in a custom reporting engagement. Should custom report development be required, the ShoreTel Advanced Applications organization is happy to evaluate needs and provide a proposal with associated effort based price quote.

Benefits
• Provide customers with data that directly impacts how they run their businesses
• Reports are easily accessible via web links & provide optional advanced features
  – Input parameter sets can be saved for repeated runs
• Compatible with ShoreTel releases 7.0 and greater

Overview
• Specialized reports delivered according to customer specifications
• Summary views can combine data from ShoreTel CDR as well as external customer data sources or additional data generated as necessary

Examples
• Custom User Activity Report combining data from ShoreTel CDR and external customer database
• DND Activity Report (requires TAPI application for recording additional data points)

SHORETEL ENHANCED REPORTS

Overview

- Historical CDR based Reports that extend ShoreTel’s built-in reporting capabilities
- Call History Report – Presents ‘cradle to grave’ information on a call by call basis
- Calls by Dialed Party Report – Presents incoming calls by the number dialed (the called party)
- Calls by Origin Report – Lists incoming calls by caller ID origin
- Workgroup Agent Detail Login/Logout Report – Shows exactly when each agent logs in & out
- Workgroup Agent Ring Time Report – Shows how long each call rings at the agent extension
- Workgroup Custom Service Level Agreement Report – Average Speed of Answer based modeling
- Workgroup Exceptional Call Report – Shows calls not connected to an agent with reasons; includes Abandoned Calls only view
- Compatible with ShoreTel releases 7.0 and greater
- Supported along with all built-in reports by ShoreTel Report Scheduler

Target Customers

- Any company that leverages ShoreTel reports to drive their business
- Any company that uses ShoreTel Workgroups

Benefits

- Analyze business operations from new angles
- Help call center supervisors to gain an added level of insight into operations
- Track performance, improve operations, and anticipate problems
SHORETEL REAL-TIME WORKGROUP MONITOR APPLICATION

Overview

- Real-time performance display for ShoreTel Workgroups
- Statistics displayed in graphical and table formats
- Displays both Queue & individual Agent trends
- Customizable thresholds for visual “red/yellow/green” status and audible alerts
- Software loaded onto ShoreTel server and associated client desktop machines

Benefits

- Enhancement to Workgroups for customers who do not require full Contact Center
- Enables call center supervisors to react quickly to trends such as increasingly long wait times or large numbers of abandoned calls
- Supervisors customize their application “palette” to contain desired views
- Intuitive and easy to configure
- At a Glance, Trend, and Abandoned Call Detail views for groups
- Summary & Detail comparative performance reports for individual agents
- Large format option for displaying key statistics on big screens

Target Customers

Any company that uses ShoreTel Workgroups and wants to improve call center efficiency and customer satisfaction
**APPLICATIONS BY FUNCTION:**

- **ShoreTel Advanced Applications Catalog**
- **ShoreTel Advanced Applications Catalog**
- **Advanced Unified Communications**
- **CRM & Business Process Integration**
- **Contact Center**
- **Enhanced Reporting**

**SHORETEL REPORT SCHEDULER APPLICATION**

**Overview**

- Automatically runs ShoreTel built-in and enhanced reports
- Flexible report scheduling (daily, work week, weekly, monthly, quarterly, …)
- Report output formats: PDF, RTF, XML, Excel, and Crystal Reports
- Options for saving and EMailing reports
- Supports ShoreTel CDR archive database
- Geared towards an Administrator who schedules reports for Users
- Uses XML report parameter files and the MS Windows Task Scheduler
- Software is installed on a non-ShoreTel Server or client machine.

**Benefits**

- Automatically run, then save and/or deliver reports to Users by EMaiI
- Minimize system performance impact by scheduling reports to run during off hours
- Completely eliminate system performance impact by using the CDR archive database

**Target Customers**

- Any new or existing ShoreTel customer who could benefit from automatic generation and delivery of reports
- Non Contact Center Customers
